A tool to celebrate achievements and explore next steps

Education for Sustainability (EFS) is about developing the knowledge, skills, values & behaviours for people to act in ways that contribute to more sustainable patterns of living. The Core Indicators rubric outlined on this poster can be used by schools to support their discussions and decisions about where they are on their journey towards sustainability. The indicators provide signposts for celebration of the school's current position and indications of the priorities for development.

For more information about EFS and the AuSSI-SA rubrics and core indicators visit the NRM Education website at:
